Profile

I am an application and web development professional with more than 8 years of experience. I posses multiple skills covering many fields including – Javascript, CSS, HTML, PHP and Creative Suite. I have been a Front End Application Developer where I utilized my new concepts to create innovative solutions and showcase product value.

Skills

Coding – Hand-coding HTML (HTML5 & XHTML), CSS (CSS3), XML, Javascript, jQuery, Ajax, Bootstrap, Handlebars, Highcharts, Node, Facebook API, Open Graph, Grunt, PHP, SQL (MySQL), CodeIgniter, RESTful Web Services, Drupal, WordPress, Object-Oriented Programming, MVC, SVN, Git, ActionScript, Asp.net, Java, Objective-C, C++, C#, Cocos2D, LAMP, Linux, XAMP, WAMP, Regular Expressions, Stored Procedures.

Design – UI/UX, Adobe Creative Suite (CS3 - CS:CC), Photoshop, Illustrator, Flash & Flex Builder, and InDesign.

Experience

Frontend Application Developer (Contract), Clorox; Oakland, CA — 8/2015 to 12/2015

All of the projects done at Clorox and its other brands where done using Wordpress and different mixes of both Timber and Handlebars for reusable elements on other pages and sites that needed to be responsive to both mobile and desktop viewports. This was needed to change the page layout depending on the device used to browse the site. The majority of the work done at clorox was Scss and Javascript.

Senior Programming Analyst (Contract), Sonoma County; Santa Rosa, CA — 4/2015 to 7/2015

Developed a .net customer facing search portal using Javascript and REST API services for looking up health inspection reports.

Frontend Application Developer, Littler Mendelson; San Francisco, CA — 4/2014 to 4/2015

Took over development of a data entry application using .net. Created a dashboard application using Highcharts, a .net MVC web application. Developed several CRUD applications, oversaw management of code as a lead team member, and redesigned existing applications that took a significant amount of time to load and dropped that down to 10th of seconds by optimizing stored procedures and caching data on the server.

Web Developer, Innovative Interfaces; Emeryville, CA — 6/2013 to 3/2014

Maintained existing hand coded CMS websites in a LAMP environment and oversaw development of their new Drupal sites. Originally hired as a contractor but was brought on as a full time employee.

Web Developer (Contract), Juxta Labs; Mountain View, CA — 5/2012 to 7/2012

Hired to create the wordtag.com (which was a purely HTML, CSS, and Javascript website) for the launch of their Facebook and mobile app. After the successful completion of the project I was asked to add a music feature to their Facebook app Yearbook that was written in CodeIgniter.

Web Developer, Owner of Massive Cake; Sacramento, CA — 1/2009 to 6/2013

I created Massive Cake to continue developing and designing websites for freelance. Creating and designing websites for local businesses, mostly Drupal and Wordpress sites.

Web Developer, Eyecandy Marketing; Sacramento, CA — 6/2006 to 12/2008

As a web developer and graphic designer I created websites (mostly Wordpress and Drupal sites), print pieces and logos (Photoshop and Illustrator). Followed and created brand guidelines and worked directly with clients for consultation and trainer. I also was responsible for managing email campaigns, designing and implementing database schemes (MySQL).

Education

Studied Art and Design at Sierra College, Rocklin, CA 2008
Studied Programming at American River College, Sacramento, CA 2003-2005
